Bharath Banothu

San Francisco, CA | bbanothu1997@gmail.com | github.com/bbanothu

Summary

Full-stack engineer and three-time founding engineer with 6+ years shipping products from 0 to 1. I've architected systems, led small teams, and owned products end-to-end — from first commit to production — at early-stage startups, plus production experience at Meta and Cerner. Comfortable moving fast, wearing multiple hats, and building without a playbook. Core stack: React, React Native, Next.js, Node.js, TypeScript, Python, and AWS.

Technical Skills

Languages	TypeScript, JavaScript, Python, Java, PHP, Ruby
Frontend	React, React Native, Next.js, HTML/CSS
Backend & Data	Node.js, Ruby on Rails, REST APIs, SQL, NoSQL, PostgreSQL
Infrastructure	AWS, Docker, CI/CD, Git, Linux, Netlify

Experience

Independent Consultant *Jan 2025 – Present*
Freelance / Full-Stack & Technical Consulting

- Delivered full-stack development and technical consulting for early-stage startups, helping teams launch and scale MVPs across web and mobile platforms
- Architected scalable system designs, optimized engineering workflows, and resolved production issues for client teams

Founding Engineer *Jun 2023 – Sep 2024*
Delivery Collective (withBites / Bites)

- Scaled a food delivery startup from 3 to 1,100+ weekly active customers by building and maintaining the customer-facing web and mobile experience and designing the backend infrastructure end-to-end
- Monitored and supported live order processing outside standard hours to protect customer satisfaction and retention during the company's highest-growth phase
- Built with Next.js, React Native, Node.js, Python, PostgreSQL, AWS, and Git

Founding Engineer (Frontend) *Nov 2022 – Jun 2023*
Outpace.ai

- Built core MVP1 features as the frontend engineer on a small founding team, using React, Python, Git, and SQL

Founding Engineer → Lead Engineer *Aug 2021 – Jun 2023*
Datatrixs (formerly FinPro)

- Led end-to-end product design and delivery of Datatrixs' MVP1 in a 4-month turnaround, partnering directly with the CEO and product designer
- Promoted to lead engineer; directed technical strategy and roadmap execution as the product matured
- As founding consultant for FinPro (Aug 2021 – Nov 2022), led MVP1 from concept to launch in 6 months and managed a team of 3 contractors and 1 designer
- Built with React, Node.js, AWS, Seed, Netlify, and Git

Software Engineer III (Contract) *Jul 2021 – Nov 2022*
Meta

- Designed and shipped key features for Channel Marketing Home, completing its migration from the legacy Marketing Home product
- Collaborated within a cross-functional team of 20 engineers, designers, and product owners, and mentored newly onboarded engineers
- Built with React, TypeScript, JavaScript, Hack, and Python

Software Engineer *May 2020 – Jul 2021*
Cerner

- Built Patient eSignature, an iOS application enabling secure document signing at the point of care
- Extended the product with a web version for integration into Cerner's EMR portal, partnering with a 7-person engineering team and cross-functional stakeholders to ship targeted features
- Built with React, TypeScript, JavaScript, Node.js, Ruby on Rails, and Git

Software Engineer Intern *May 2019 – Aug 2019*
American Family Insurance

- Built a third-party vendor data API to streamline claims processing and implemented a weather-related claims rating algorithm in Java

Front End Developer *May 2018 – Dec 2018*
Facilities Planning & Management, Iowa State University

- Redesigned and developed internal web portals plus 15 external client sites, improving UX and site performance

Education

Iowa State University *Dec 2019*
Bachelor of Science, Computer Science

Activities

Competitive Chess (2012 – Present; Captain, Moline HS Chess Team, 2015) | Boxing, National Collegiate Boxing Association (2016 – Present)
